

A FOG CANNON™ FROM PROTECT™

secures your valuables in seconds and makes it
impossible for the burglar to steal anything!

SECURED IN SECONDS

EXPERTS IN SECURITY FOG

It is not new for us to make Fog Cannons™ against burglary, robbery and vandalism. We are the world's largest manufacturer in our field and have since 2000 delivered 100,000+ Fog Cannon™ units to our partners in over 50 countries on 6 continents.

Innovation lies in our DNA. We are constantly developing to protect valuables smarter and faster. The motivation is that our solutions and products become the new standard and are more flexible and less visible compared to more traditional forms of security.

A PROTECT™ Fog Cannon® stands for reliability, high quality, long life, intelligent solutions, smart add-ons, Danish design, are inexpensive to operate - and are easy, fast and safe to install and service. We also provide up to 5 years manufacturer's warranty.

Our solutions can be used everywhere from large warehouses to private homes, and they will not leave any traces or odors.

PROTECT™ does its part to make the world a little safer to live in, so that people can find peace and joy, and companies can grow.

- Two times receiver of the Børsens Gazelle Award (Danish growth award)
- Security Company of the Year in Denmark 2011

SECURED IN SECONDS

SECURED IN SECONDS

WE SECURE YOUR VALUABLES IN SECONDS

1 A burglar breaks through a window and triggers a sensor. Both the alarm system and the fog machines are activated, and the room is filled with a white, dense, dry fog, so the burglar can't even see his hand in front of his face! He does the only thing he can - turns around and runs out the same way he came in.

A fog machine is a generator that uses a heater to convert harmless fluid into waves of artificial fog which is disorientating. This all happens within a few seconds!

2 The security fog is as thick and harmless as the "smoke effect" at concerts and theatres.

3 The security fog can remain in a room for up to one hour. If the burglar tries to come back, the fog will discharge again!

4 PROTECT Fog Cannons® are designed to fit most premises. They can be mounted overtly or as an elegant covert solution.

Security fog is an active solution, and within seconds it makes the burglar change his mind.

Security fog works against burglaries, robberies and vandalism. The fog can be discharged automatically via sensors, manually with a "panic button" or remotely, a control center.

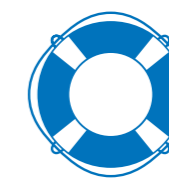

Recover faster and more painlessly after a burglary. The system is cheaper than most think. Ask your insurance company for a discount on the premium.

Our Fog Cannons™ come with a 5-year warranty (*Xtratus-models come with 2 years). Visit our website for more information about the warranty.

PROTECT™ operates in over 50 countries, you can count on fast delivery, a contact hotline and excellent service. We have many satisfied customers all over the world.

We have our own research and development, and production departments, and our technical hotlines are staffed by experts in security fog. Our customers appreciate our support in everything we do!

Our different Fog Cannon™ models suit different room sizes. Additionally, they can be installed to your specific requirements.

We offer courses and e-learning for product training, technical issues, assembly and servicing. This ensures high quality installations for our users.

PROTECT
→ **API** APPLICATION PROGRAMMING INTERFACE

API capability
We can provide program codes for integration of security fog in the customer's software environment.

A STRONG BUSINESS CONCEPT

Security fog from PROTECT™ is currently sold in more than 50 countries across the world - and the number is rising.

Our products are sold through partners/distributors and alarm installers to end-customers. We know that alarm installers have the closest contact with companies or homeowners who need a security solution such as this.

Our business model is the most loyal and reliable in the industry. We offer total support in sales, technical service and marketing, and excellent value for money.

PROTECT Fog Cannons® and fluids are tested and approved by independent testing laboratories throughout the world.

Every day we, together with our partners/distributors, are working with small and large alarm com-

panies. Some of the most famous are G4S, Stanley Security, ADT, Chubb, Securitas, Prosegur and Nokas.

We also have good co-operation with the police, fire service and insurance companies, who strongly recommend our highly effective and harmless security solution.

OUR CUSTOMERS ARE HAPPY CUSTOMERS

BUSINESS

Our solutions are not limited to a specific customer group. The vast majority of our Fog Cannons™ can be found in banks, supermarkets, shops, educational establishments, warehouses, petrol stations and offices. No room is too large or too small.

We provide solutions that give peace of mind. And with connection to the internet, you can even keep up with the status on your phone, so you always know that your fog installation is “ready for the fight”.

PRIVATE

Also, security fog for private users is an effective protection for art, jewellery, furniture, cash, hi-fi, cars, guns and much more. There is nothing worse than losing irreplaceable items.

Particularly private and exclusive stores and offices choose hidden installation behind the wall or ceiling. An elegant solution that works as an extra surprise for the burglar.
