BE SAFE – SLEEP WELL WITH SECURITY FOG

Cash, tobacco products and liquor are what burglars look for most when they break in to grocery stores. Most often they shatter shop windows or work heavy iron doors open, making a break-in a costly matter for the shop owner.

Fortunately grocery stores in Denmark and abroad have long been aware that fog protection is an efficient way to prevent heavy losses, disappointed customers, insecure staff, higher insurance premiums and the heavy cost of replacing facades.

” STRENGTHENS THE FIGHT AGAINST BURGLARY

“Fog protection is the biggest single breakthrough in store protection in recent years, and today we never open a store until it has fog protection. In the past a band of thieves could break into five stores in one night. Nine out of ten burglars run off immediately when they are faced with the fog. As more or less nothing gets stolen, the fog very quickly pays for itself - the price of one burglary could pay for maybe 10 Fog Cannons,” explains Safety Manager, Peter Bruun of REMA 1000. The Norwegian-owned retail chain chose PROTECT following rigorous testing of the quality and speed of the fog protection system.

Spar, the world’s largest grocery chain, has installed fog protection in a number of its UK stores. “the results are convincing. The number of burglaries is dramatically reduced when you have fog protection. The burglar often fails to take anything when he breaks in to a store with fog protection,” concludes Matthew Robinson, PROTECT UK.
